PROFESSIONAL SUMMARY

Quality Assurance Specialist with over 3 years' experience across fintech SaaS and e-commerce platforms, covering the full test cycle from test design to release sign-off. Builds and maintains automated regression suites in Playwright (TypeScript, JavaScript, Python) and Cypress (JavaScript), and tests SaaS REST APIs end to end from Swagger/OpenAPI and Scalar specifications, executing requests in Postman to verify schemas, authentication and error handling. Integrated an AI assistant into the Azure Boards bug-tracking and reporting workflow to remove repetitive manual admin. Strong on defect documentation and traceability, and on working closely with developers and the business requirements team throughout the sprint cycle.

WORK EXPERIENCE

Sterling Wells — Kathmandu, Nepal
November 2025 – Present

Quality Assurance Specialist (Mid-level)

- Test fintech SaaS products — RentalBux (MTD software for UK landlords and sole traders), TMS and CRM — running functional, regression, smoke and UAT cycles for every sprint release.
- Build and maintain automated regression and end-to-end suites in Playwright with TypeScript and Python, reducing the manual effort required on each regression pass.
- Test and validate REST APIs using Postman, Swagger/OpenAPI and Scalar — verifying status codes, response schemas, request payloads, authentication flows and error handling — and log defects with reproducible request/response evidence.
- Integrated Claude (LLM) into the Azure Boards workflow to auto-draft defect tickets with the correct sprint and state fields, and to generate daily QA progress reports from tracked test activity.
- Work with developers and the business requirements team to clarify acceptance criteria before test design, and run cross-device and cross-browser testing on real devices using BrowserStack and ADB.
- Act as the release gate — maintain test cases and traceability in Azure Boards and Jira, review pull requests in GitHub, and run smoke and regression checks before each deployment sign-off.

Matat Nepal — Kathmandu, Nepal
August 2023 – November 2025

Associate QA Engineer

- Led QA on WordPress and Shopify e-commerce builds, covering themes, plugins, checkout, forms and full UI/UX validation.
- Built and maintained Cypress (JavaScript) automation for login, checkout and regression flows.
- Validated bulk product data mapping and catalogue imports, catching mapping, pricing and variant errors before go-live, and audited on-page SEO metadata, schema markup and tracking pixels against Figma designs.
- Owned test plans, bug tracking and QA documentation for every deployment, executing cross-browser and mobile testing across Chrome, Firefox and Safari in sprint cadence with the development team.

SELECTED PROJECTS

Manual QA Bug Reports — 4 projects, 59 defects — Azure Boards format reports with steps, expected and actual results, severity, priority and annotated screenshots across four Shopify and WooCommerce builds.

Amazon Playwright Automation — Automated Amazon e-commerce flows in Playwright with TypeScript, using the Page Object Model with separated locators, fixtures and test data.

Ease-meds — Online medicine delivery system in core PHP and MySQL; QA across ordering, form validation and end-to-end user journeys.

ProjectPassout — Next.js and Framer Motion college project marketplace; tested the React-to-Next.js migration including routing and SEO.

TECHNICAL SKILLS

Automation	Playwright (TypeScript, JavaScript, Python), Cypress (JavaScript), Page Object Model
API testing	Postman, Swagger/OpenAPI, Scalar, REST API testing
Testing types	Functional, Non-functional, Regression, Smoke, Sanity, UAT, UI/UX, Cross-browser and cross-device, Performance (JMeter)
Test management	Azure Boards, Jira, ClickUp, Asana, Git, GitHub
Tools and platforms	WordPress, Shopify, WSL (Ubuntu), React.js, Next.js, BrowserStack, ADB, Chrome DevTools
Programming	JavaScript, TypeScript, Python, HTML, CSS, PHP
AI in QA	LLM-assisted test-case generation, automated defect reporting and QA report generation

EDUCATION AND LANGUAGES

Education	Bachelor of Computer Applications (BCA) — G. P. Koirala Memorial College, Tribhuvan University
Languages	English (professional working proficiency) · Nepali (native)
